Resources for Sentinel Laboratories Conducting Risk Assessments

Risk Assessments should be conducted for any new or reemerging pathogen or high risk procedures and reviewed annually.

Log on to [http://www.dshs.texas.gov/lab/eprResources.shtm](http://www.dshs.texas.gov/lab/eprResources.shtm), for the risk assessment developed for sentinel labs. There is also an example of a completed sample risk assessment and a PowerPoint from the National Laboratory Training Network (NLTN) about risk assessments.

Navigate down to the bottom of the page for these resources.
