Requests for Articles

Please provide any deadlines for articles at the time you request them. We can handle rush requests when needed if we know in advance.

Systematic and Scoping Reviews

The Library is now supporting systematic and scoping reviews on a selective basis. Factors in librarian participation include but are not limited to the following:

- Availability of access to the necessary databases
- Librarian inclusion in applicable team communications
- Literature search deadline(s)

One early benefit of the merger with UT Tyler is that we can draw on the main campus library's access to Scopus and Web of Science, depending on availability of the main campus's Muntz Library personnel to run the searches.

UT Tyler Muntz Library Access

UTHSCT students and staff have walk-in access to the Muntz Library on the UT Tyler main campus. UTHSCT personnel can also register to check out books at Muntz Library. UTHSCT ID badge and a valid driver's license or picture ID are required. For hours of operation, see <https://www.uttyler.edu/library/>.

For the time being, only two computers are available at Muntz Library for use by non-main-campus users.

Lamination

We continue to offer self-service lamination and free laminating sheets for use on our machine for official business as long as we can maintain the supply. Sheets are available in standard size and 11" X 17". We also have a very limited supply of business card or luggage tag size in secure storage.

Mometrix Nursing Certification Exam Study Resources

The Mometrix nursing specialty certification exam study tools are now linked from the Library home page. These include both e-books and interactive online flashcards. When you click the link, you will be taken to a list of specialties, and clicking a specialty will show links to both the e-books and the flashcards. These review materials are available both on- and off- campus. Off-campus access requires you to be logged on to the network via VMware Horizon. If you are not logged on to the network, you will be prompted to click a login link after you click the Mometrix link, and your UTHSCT login will work there.
