**October Is
National Medical Librarians Month**

Web of Science

The HSC now has access to Clarivate's Web of Science (WOS) database at <https://www.webofscience.com>. WOS provides for discovery of literature in the biomedical sciences, social sciences, and nursing, including content from journals, books, and conference proceedings.

The basic search function of WOS works similarly to PubMed, including various filters that display on the left side of the screen when search results are displayed. These filters allow you to limit your search results by medical specialty, and by topics such as nursing, public health, statistics/probability, biomedical social sciences, business, and many other fields that will give you more precise results.

Access is made possible courtesy of the UT System Digital Library and the UT System Academic Library Collection Enhancement Program in cooperation with the UT Tyler Muntz Library.

Water Dispenser

A filtered water dispenser has been installed across the hall from the Library in the alcove outside Lecture Hall A

(Room G3202). It provides both cold and hot water.

Student Textbooks

The Library obtains a copy of each Health Science Center course textbook. These books are on reserve for in-library use only. If you are looking for a course textbook in the Library and can't find it on the shelf or in the Online Catalog, please let a member of the Library staff know. Please leave any books you use on a table so their use can be recorded.

A very small number of course textbooks are available online through the Online Catalog. However, many online textbooks are not available for purchase by libraries, or they are part of expensive ebook package deals.

Student Printing

This is a reminder that student ID badges do not work on the Library printer or any other campus printers that use Secure Print. Instead of using the ID badge, students should attach documents to an email and send it to student.printing@go.uthct.edu. When that is done, a notification email will be sent to the student's GO email address. The email may take up to 15 minutes to arrive. The email includes a 4-digit ID that can be on the printer to retrieve printouts by pressing the Card ID button and entering the code when prompted. The first ID received via email will stay the same, so the student can use it for subsequent printing without waiting for the notification email.

New Books and E-Books

Thank You

- Lesa Carsten, Plant Operations
- Tammy Coquat, Mail Room

- Karen Christopher, Housekeeping
- Jim Post, Information Technology
- Rehabilitation Services

Library Hours

8:00 a.m. - 5:00 p.m., Monday - Friday

Location

3rd floor G Building (Academic Center)
